PERFORMANCE

2007-09 Arctic Cat F1000 Lightweight Muffler 131-107 High Temp Black

Straightline's lightweight mufflers are one of today's standards with low decibel readings and a great low tone. Muffler loses 12+ lbs on your Arctic Cat snowmobile. Straightline also offers single pipes for the F8 and F1000.

Installation Instructions

Remove old muffler. Remove rubber grommet and install into Straightline's muffler as shown.

Install Straightline muffler into stock location as shown. Aligning the mounting tabs may be slightly difficult and take some time. After muffler install, re-insert the stock spacer and clip to the grommet area as shown on complete install.

Be sure the muffler has no manufacture defects. If the muffler has been run/used there are no warrantees for fitment.

No Jetting or Clutching required to run the lightweight Muffler.
