

STRAIGHTLINE

PERFORMANCE

2005-11 Arctic Cat M6/M7 Lightweight Muffler 131-109 High Temp Black

Straightline's lightweight mufflers are one of today's standards with low decibel readings and a great low tone. Silencers lose 7+ lbs on your Arctic Cat snowmobile.

Installation Instructions

Best to start with removing the side panel of your machine. Remove the old muffler. Remove the rubber O-ring installed in the stock muffler and install into the Straightline Performance silencer as shown.

Install the new lightweight silencer into the stock locations and install the clip and pipe springs.

Be sure the muffler has no manufacture defects. If the muffler has been run/used there are no warrantees for fitment.
