

**Ski-doo 600R E-TEC Y-Pipe  
134-180**

### Installation Instructions

Remove stock y pipe; be sure to keep all stock springs. Re-use or replace y-pipe gaskets

Be sure the Straightline y-pipe has no manufacture defects. If the Y-pipes has been run/used there are **no warrantees** for fitment.

#### Fuel programming Requirements

There are no fuel programming changes required to run the Straightline 600R E-TEC Y-pipe.

Clutching – Operating PRM with the Straightline 600R E-Tec Y-pipe is 8000-8100 RPM.  
(3hp gain)

The Straightline Y-pipe also improves the torque band 2-3lbs of torque from 7700-8100 RPM  
Straightline recommends adding a Pivot bolt kit (121-245) to your snowmobile to help enhance the power. Kits are available from Straightline or your local Ski-doo shop.
